Interior design psychology is a field within environmental psychology, which concerns the environmental conditions of the interior. It is a direct study of the relationship between an environment and how that environment affects the behaviour of its inhabitants, with the aim of maximising the positive effects of this relationship. Through interior design psychology the performance and efficiency of the space and the wellbeing of the individual are improved. Figures like Walter Benjamin, Sigmund

### Interior design psychology - Wikipedia

Psychology is an exciting field and the history of psychology offers the opportunity to make sense of how it has grown and developed. The history of psychology also provides perspective. Rather than a dry collection of names and dates, the history of psychology tells us about the important intersection of time and place that defines who we are.

### History of Psychology | Noba

Modern color psychology dates its origins to the early 19 th-century when Johann Wolfgang von Goethe published his book, Theory of Colours. Though there is some debate regarding the implications of certain shades, researchers, interior designers and marketing professionals seem to agree on these basic tenants: Red: Symbolizes power and passion. It can be used to warm up spaces and make them feel more intimate.
