Time is the continued sequence of existence and events that occurs in an apparently irreversible succession from the past, through the present, into the future. It is a component quantity of various measurements used to sequence events, to compare the duration of events or the intervals between them, and to quantify rates of change of quantities in material reality or in the conscious experience.

Time - Wikipedia

Emergency management is the organization and management of the resources and responsibilities for dealing with all humanitarian aspects of emergencies (prevention, preparedness, response, mitigation, and recovery). The aim is to prevent and reduce the harmful effects of all hazards, including disasters.. The World Health Organization defines an emergency as the state in which normal procedures ...
